

GUIDE SETTING SYSTEM

Lakukan langkah di bawah ini untuk Server, Client 1, dan Client 2

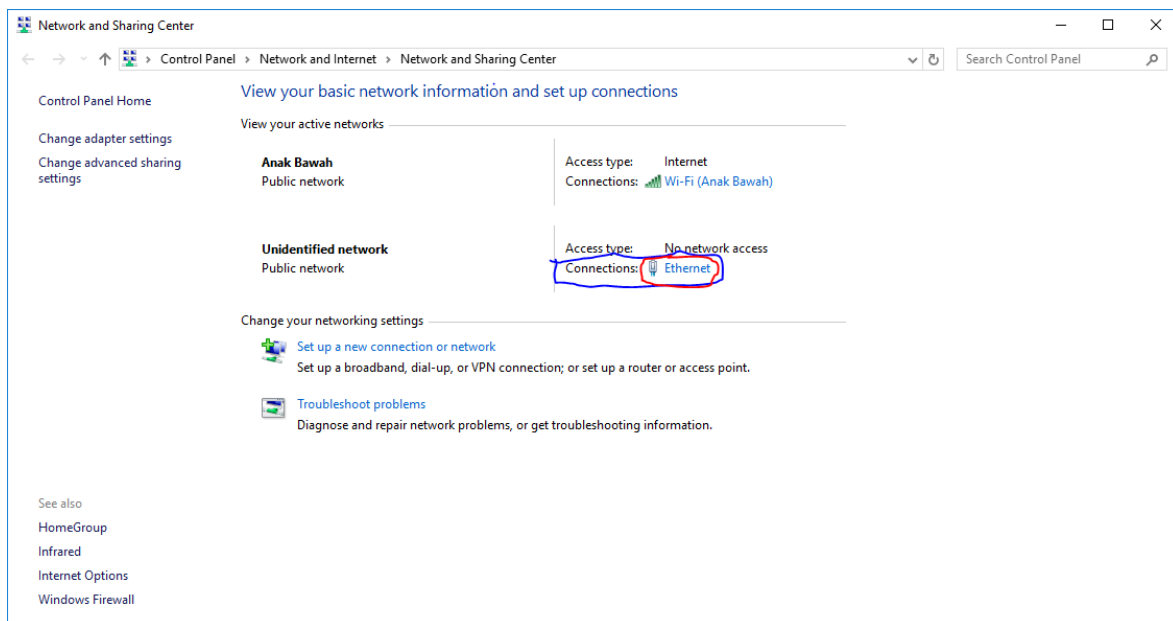

1. Pastikan semua kabel sudah terpasang dengan benar (cek lampu indikator pada switch)

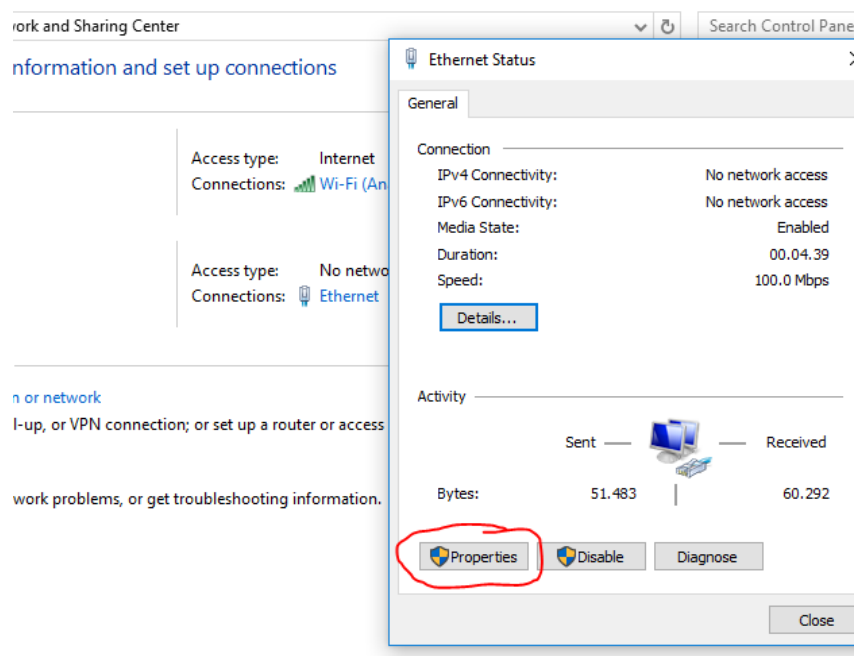

2. Buka *Network and Sharing Center*

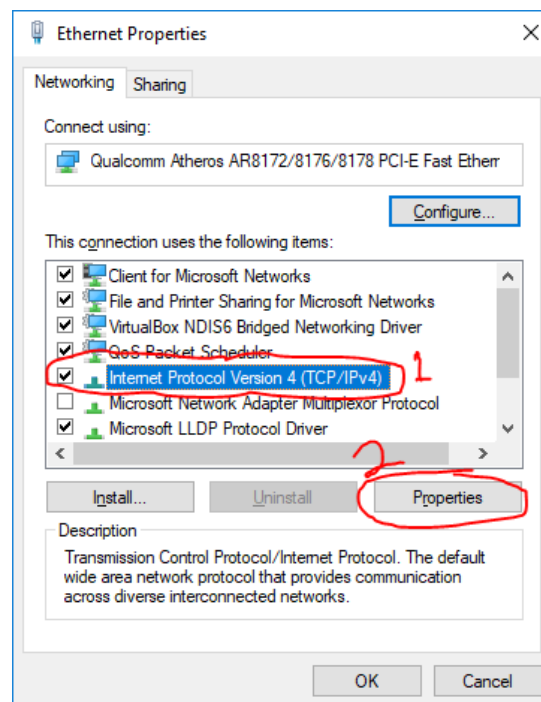

3. Pada bagian “*Connection : Ethernet*”. Klik kata Ethernet.

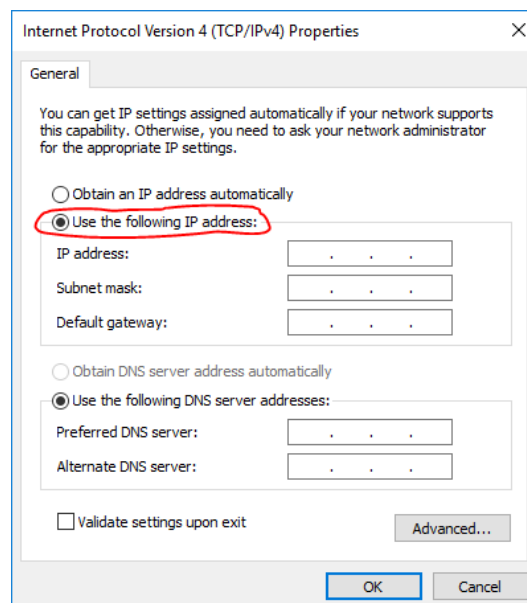

4. Klik button “*Properties*”

5. Pilih *Internet Protocol Version 4 (TCP/IPv4)*, klik button “*Properties*”

6. Klik “*Use the following IP address*”

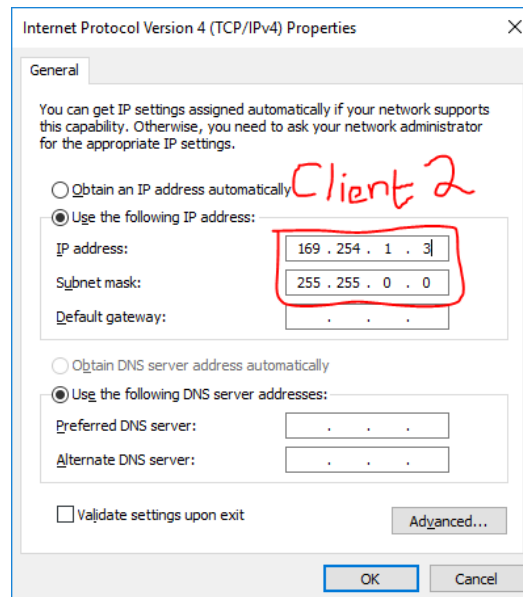

7. Pada **IP address** dan **Subnet Mask** isikan
- Untuk server
 - IP address = “169.254.1.1”
 - SubnetMask = “255.255.0.0”

The screenshot shows the 'Internet Protocol Version 4 (TCP/IPv4) Properties' dialog box. The 'General' tab is selected. The text 'Server' is handwritten in red above the IP address field. The 'Use the following IP address' radio button is selected. The IP address field contains '169 . 254 . 1 . 1' and the Subnet mask field contains '255 . 255 . 0 . 0'. These two fields are circled in red. The 'Default gateway' field is empty. The 'Obtain DNS server address automatically' radio button is selected. The 'Preferred DNS server' and 'Alternate DNS server' fields are empty. The 'Validate settings upon exit' checkbox is unchecked. The 'Advanced...' button is visible. The 'OK' and 'Cancel' buttons are at the bottom.

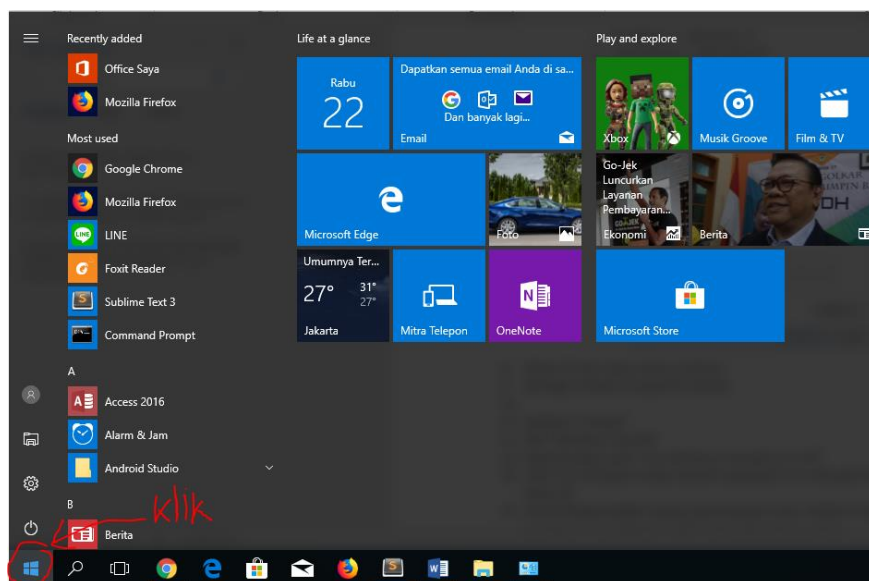

- Untuk Client 1
 - IP address = “169.254.1.2”
 - SubnetMask = “255.255.0.0”

The screenshot shows the 'Internet Protocol Version 4 (TCP/IPv4) Properties' dialog box. The 'General' tab is selected. The text 'Client 1' is handwritten in red above the IP address field. The 'Use the following IP address' radio button is selected. The IP address field contains '169 . 254 . 1 . 2' and the Subnet mask field contains '255 . 255 . 0 . 0'. These two fields are circled in red. The 'Default gateway' field is empty. The 'Obtain DNS server address automatically' radio button is selected. The 'Preferred DNS server' and 'Alternate DNS server' fields are empty. The 'Validate settings upon exit' checkbox is unchecked. The 'Advanced...' button is visible. The 'OK' and 'Cancel' buttons are at the bottom.

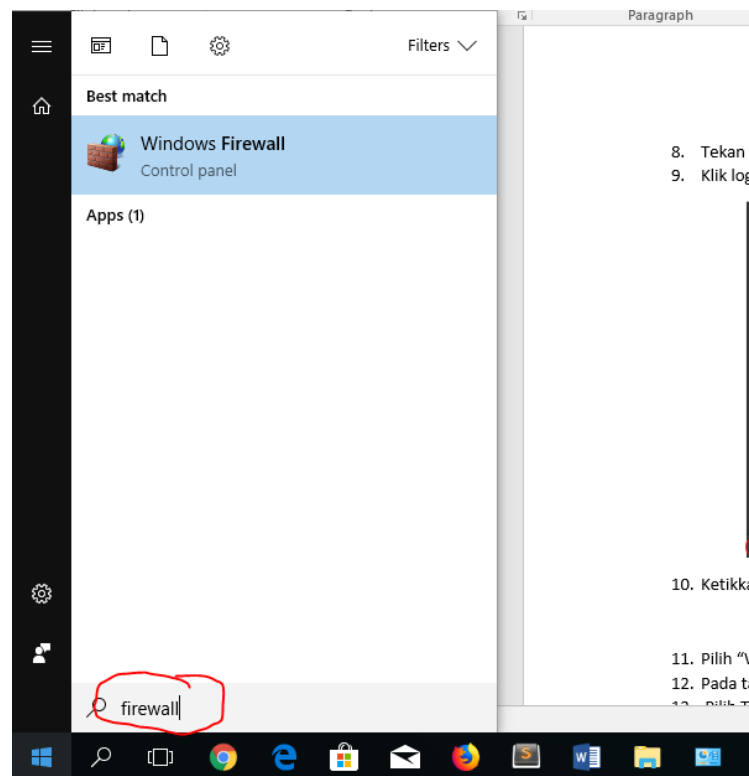

- c. Untuk Client 2
- IP address = "169.254.1.3"
 - SubnetMask = "255.255.0.0"

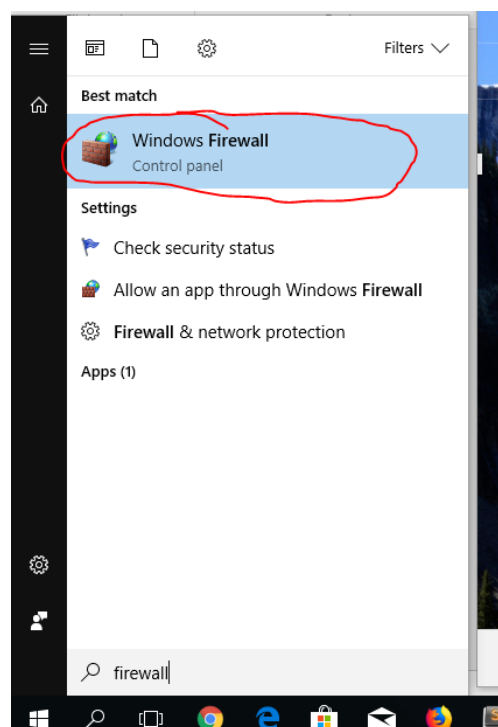

- Tekan OK dan tutup semua windows
- Klik logo windows di pojok kiri bawah

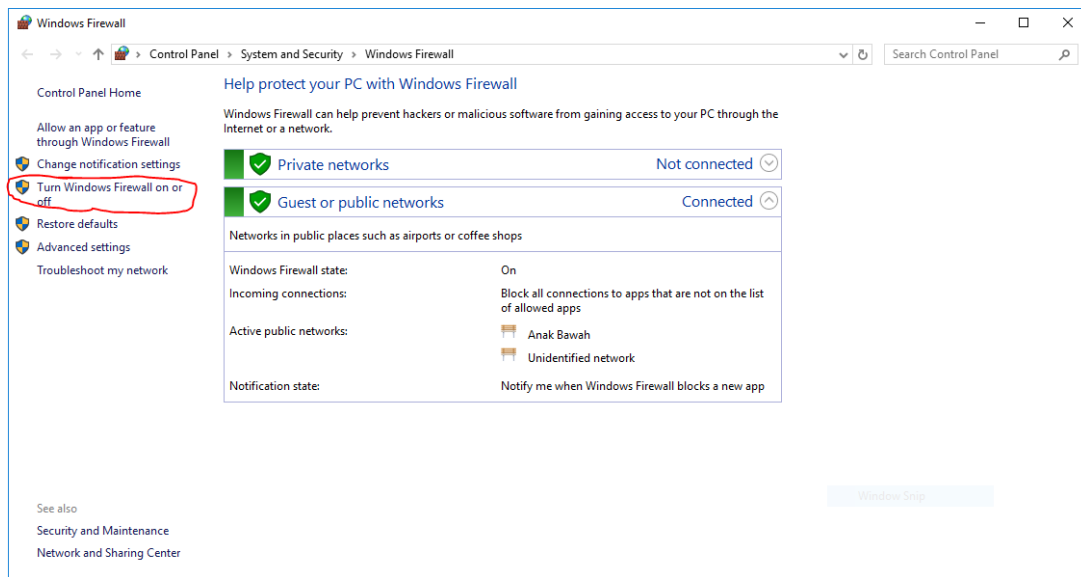

10. Ketikkan ***“Firewall”***

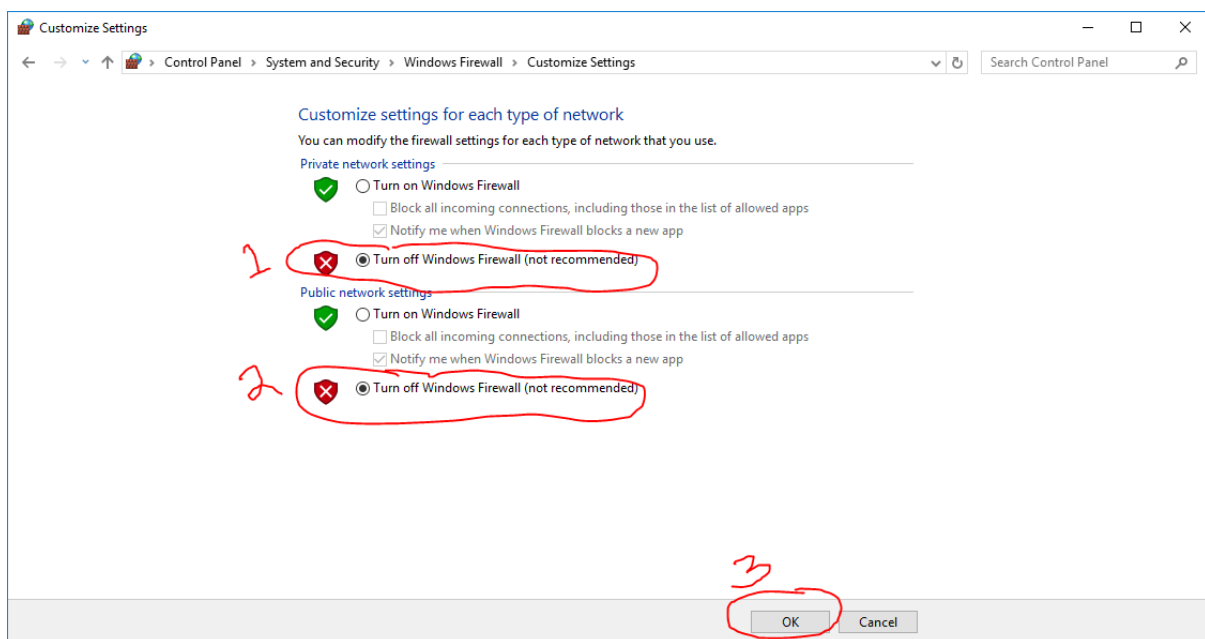

11. Pilih ***“Windows Firewall”***

12. Pada tab di kiri, pilih **“Turn Windows Firewall on or off”**
